1. Win Fall System

WIN-FALL SYSTEM;

We are glad to provide you with this great system. You will have many winners with it We want you to learn as much as possible in the number game. You will learn the importance of

SYSTEM SWITCHING

and go on to INVEST in our other great systems.

All of our clients have gone on to purchase all our systems and are having many winners each day.

THE COUNT UP METHOD

All parts of the Win-Fall System uses past number drawn calendar charts.

These are just calendars with the numbers that have been drawn written on them.

In the count up method you must use the last drawn pick three number In your states daily number drawing This number becomes very Important. There are several ways to use the count up method. The first way is just to count up the number of calendar spaces using each digit in

LAST NIGHTS DRAWN NUMBER.

Where you land after counting up that

number, is where you draw your NEW digits for the up-coming drawing.

For example; Lets say the number for last nights drawing was 563 on a monday. You then count up the calendar on past mondays using the digits Found in 563. You count up 5 and 6 and 3.

Where you land you use that number to select your future digits from. You can also-count up from the next day tuesday using the empty box of that nights drawing as count 1 and counting up from there. Here is an illustration of these methods:

Mon Tue [5 up on mon would be 103]

701- 599 [6 up on mon would be 701]

103- 678 [3 up on mon would be 945]

006- 301

945- 890 [5 up on tue would be 301]

635- 678 [6 up on tue would be 678]

496- 125 [3 up on tue would be 678]

563- *

*Notice how you count from the empty calendar box on tuesday

You would then choose your playing numbers out of the digits you found after counting up. That would be out of

103- 301

701- 678

945- 678

***IMPORTANT (THIS IS VERY IMPORTANT PLEASE READ CAREFULLY)**

You can utilize the system better by following this step:

After you Count Up either single digits or the sum of the digits or the sum of the front or back pairs. where you land

YOU USE TWO WEEKS BEFORE AND TWO WEEKS AFTER to search for your digits for the coming nights draw. Lets refer back to our last page for an example;

Say you were counting up 3 on monday, you would use either

103

006

945

or

496

635

945

to choose your digits out of for the up-coming drawing

Notice How that is using the numbers two weeks above 945 and two weeks below 945. Most of the time the new number will be contained in those digits. You will be amazed and You will be in an area to pick a winner.

We mentioned the sum of the digits. This is another method we will go on to talk about now.

THE ADDING METHOD (sum of the digits)

You add the digits from last nights winning number and count up on your past number drawn calendar charts that total.

When you land you use that number the one above it and the one below it You can also use two weeks above it and two weeks below It.

You have two choices to count up from. You can count up on the day exactly above last nights winning number or you can count up above the day of the new drawing.

In our first page example you can count up Monday or Tuesday.

In that example $5+6+3=14$

You would count up 14 and when you landed at 14 up on your calendar chart use the one week above or two weeks above and below method for choosing your new digits.

You will be astonished how each night the winning number will be taken from there.

THE DIAGONAL METHOD (YOU MUST DO THIS METHOD)

You can add and count up the ways we have just explained, except instead of going straight up;

You COUNT UP DIAGONALLY. You keep going side to side on your calendar chart until you reach your totals.

You use our calendar chart like a checker board. You do your count like you move the pieces in the game Checkers. Where you stop is where you choose your digits from for the

up-coming drawing. You use the number you land on and the one week above and one week below number or the two week method explained earlier.

THE SATURDAY METHOD

You use the digits from Saturdays number in the ways that have been explained to you on the previous pages. You then count up Saturdays past winning numbers on your calendar chart. The numbers you find from the countup you use to find the winning digits for the upcoming week. You can also compare these digits with your daily countups. Any good matches will be hot numbers to go with for your up coming drawings.

This method has proven very successful.

This is very important, study well

The hardest part of the countup method is knowing what count to go with.

Our research has come up with certain techniques to try and make the count easier.

If you take the first day of the month and add it to the second day of the month, the totals you get for each of the digits, you use for count up IF they are the same as the totals for the winning number the night before your new drawing.

Example:

1 st of the month 349

2nd of the month 262

totals 5 10 11

notice how we add the individual digits.

$3+2=5$ $4+6=10$ $9+2=11$

Now if we find any of those totals in our totals from the night before we

use it for our count up the calendar charts.

Another technique for finding the best count up number for the night is the

same as above except you use the first of last months number, with the first of the present month to find workable totals

You can also use pairs of the monthly total technique.

Those totals too will compare to the daily totals. Example:

1st of the month 240

2nd of the month 103

can use 21, 12, 04, 03, 30 or 0 can always used as 10 in any count giving us 14, 13 when we combine them.

Remember the importance of the diagonal count up method in choosing your numbers.

In summary you can count;

1. Straight up

2. Diagonally up

You can count up using:

1. single digits

2. sum of the front and back pair digits

3. sum of the whole number.

It is important where you land, because that is where you will obtain the upcoming digits for your nights play.

You take the number where you land and the number above it and the number below it and extract a winning combination from those digits.

You can also take two weeks before and two weeks after from where you land.

If using single digits only you can take the numbers you land on each count for that digit as explained in the first part of this system.

2. How to use the law of attraction to get what you want in life

The law of attraction means to get what you want. You will want to think about learning the theory of the law of attraction, because you will be able to get what you want, but also work on yourself from the inside out. You will want to apply the law of attraction for the fact that you have to do some self help first.

The first step to the law of attraction is to know what your heart desires. You will find that your heart may desire several things, so you will need to do everything you can to make sure that your heart is really saying to go in a specific direction. You will also find that you will need to do some figuring out. Basically, you need to know whom you are and what it is that you want. You will need to consider a lot of things when it comes to the law of attraction. If your heart really doesn't want it, then you will not get it.

The second step to the law of attraction is you need to lose all the negative feelings and replace it with positive feelings. Basically, you will need to consider the fact that your feelings are going to be going in every which way. It is because of the fear that lives inside you. You will find that the fear will tell you can't, it's stupid, why try.... and you will need to lose all that negative feelings and replace it with positive energy. There are many ways that you can attract positive energy. Basically positive energy can be received from other people through techniques of massage therapy. You will also be able to have positive energy when you begin to do things like meditation and exercise.

The third step to the law of attraction is to act like you have already received what you want. You have already asked yourself for something and you have opened yourself up to the positive feelings and energy that you need to successfully reach out and take for yourself. Now you must show off all the positive feelings and show others that you truly deserve it. This step will also get you ready to receive what you want.

The fourth step is receiving what you want. You have opened yourself up to the universe and the universe has something to say about it. You will need to consider that there are many things that you will need to do in order to allow yourself to open up, but when you have successfully gone through the first three steps, this one just seems normal. It seems almost

seems natural.

If you take the time to use the law of attraction and take every step serious, in the end you will get what you want. You will be able to lose the weight, to get promotion, win the lottery, anything that your heart desires you should be able to be successful, however, you will need to take every step serious to be a success. There are steps within the steps and you will need to put your heart through the process and maybe once you start, your heart will turn a different direction and you will find that is okay. As long as you are going for what your heart desires, you will be able to find true success and happiness in your life. It is very important that you figure out what it is that your heart desires so that you can make the most out of your time on earth. What is the point of living if you aren't doing some of the things that you desire the most? You will find that the law of attraction will help you to get some of the things that your heart desires the most.
